The new feature in Photoshop for 2021, Camera Raw, is designed specifically for photographers. It overhauls the way photographers can use the application to quickly and easily get consistent looks and profiles between compatible cameras. This is helpful for those who are using DSLRs, mirrorless or other camera platforms but want their images to look the same. In addition, Photoshop's new feature in 2021, Details Enhancer, enhances images with the help of AI technology.
