Closeup of one of the four trout ornamental ponds (tanks). A. Most of the trout ponds are located in the lower level of the park (e.g. around Back Hall Pond and along the stone walls east of the building. These small ponds are about 3,500 gallons (13.5 m³) and have concrete-lined tops. 1.5' (4 cm) deep with an approximate depth of 12" (30 cm). B. The ponds had some shade provided by the surrounding greenery or were shaded by day with an overhead cover during summer months (1989). A. Pond 3, located in the West Area of the Park, at the end of a stone-walled corridor. The pond is about 3,000 gallons (13 m³) with a 4' (1.2 m) concrete top and a depth of about 15" (38 cm). B. The pond was surrounded with several evergreen shrubs and was shaded by an overhead cover for much of the summer (1989). A. Many of the ponds have been refurbished and re-located with some of the ponds being moved from their original site (e.g. the farm pond behind building 1). As a result, a number of ponds have different shapes and sizes now. No effort was made to note the location of each pond on the site map. B. Some ponds are now located in the area that was farmland. A. The farm pond was located in the West Area of the Park and was surrounded by the main building (Building 1) on three sides. Note the two stone walls on the left side of the pond. The pond had metal fencing around the western border. B. The pond has been relocated and is now in the pedestrian area. A. The original hotel was located adjacent to the pond in the West Area of the Park.
